

## Mitigating the Effects of Collisions on Reptiles and Amphibians

January 25, 2024

#### **David Paulson**

Wildlife and Endangered Species Unit Supervisor, MassDOT Highway Division

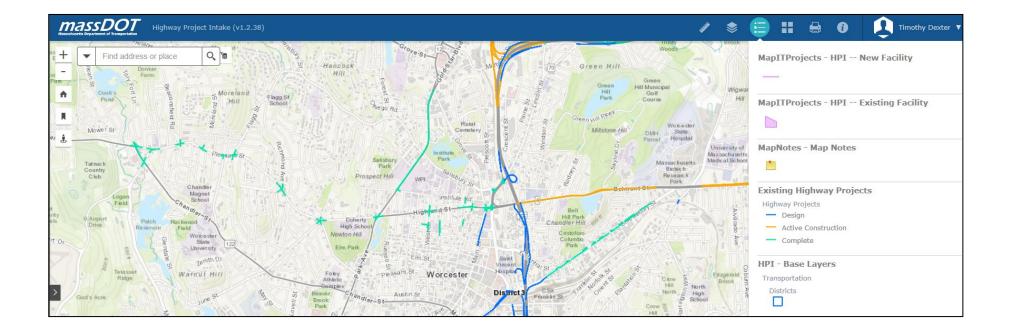

#### MassDOT/MassWildlife Staff Trainings

#### **Early Environmental Coordination**

- MassDOT Project Intake Tool (MaPIT) provides planning phase environmental screening
- Environmental Review Checklist for Scoping, Pre-25% Design, and 25% Design phase environmental reviews
- Project specific early coordination meetings

#### Stream Crossings: Design for Fish/Wildlife <u>and</u> Severe Storm Resilience

#### Stream Crossing Design

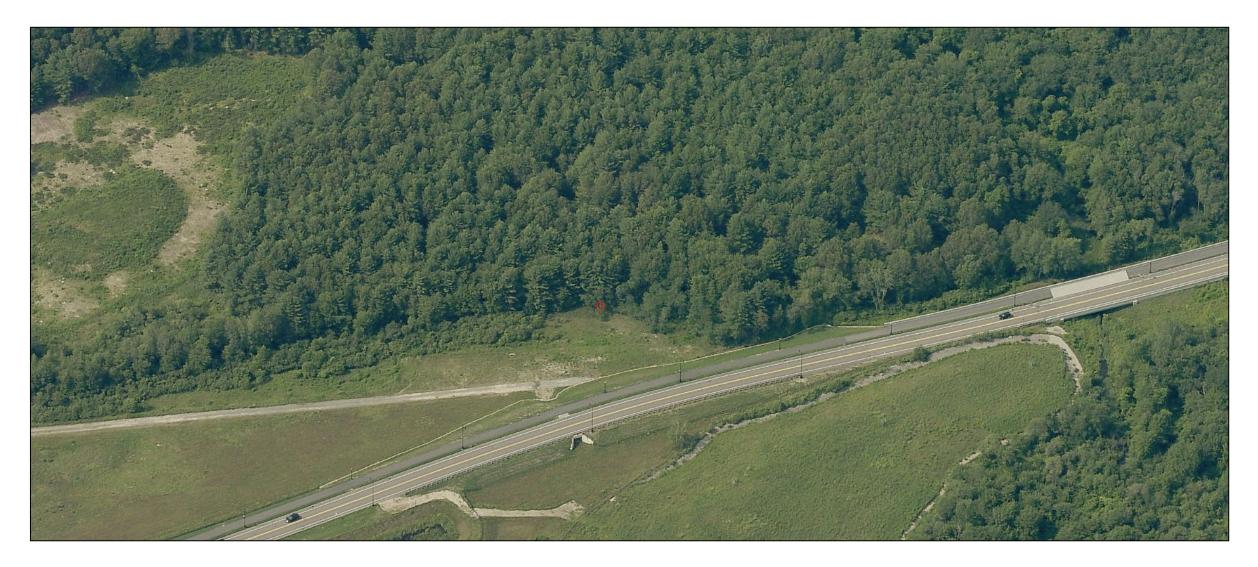

## Fencing Retrofits

Weweantic Bridge Spans the Weweantic River Marion and Wareham, MA

#### Fencing Mitigation

Completed Incomplete

A total of 3100 feet of bridge was fenced.

# **Project Initiation**

Route 119 Over Beaver Brook in Littleton

- Known wildlife vehicle collision hotspot since 2010.
- The Beaver Brook area has a high diversity of turtle species present, including the Blanding's turtle.
- Aging Infrastructure Identified by District
- Need: Bridge Replacement and Causeway Improvements
- Infrastructure Bill Funding Opportunities: Surface Block Grant Program, Wildlife Crossing Pilot Program, Bridge Investment Program
